(Zip Code)

Registrant's telephone number, including area code: **(604) 631-3115**

Not applicable

(Former name or former address, if changed since last report)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
TMC Common Shares without par value	TMC	The Nasdaq Stock Market LLC
Redeemable warrants, each whole warrant exercisable for one TMC Common Share, each at an exercise price of \$11.50 per share	TMCWW	The Nasdaq Stock Market LLC

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Item 2.02. Results of Operations and Financial Condition.

On November 9, 2023, TMC the metals company Inc. (the “Company”) issued a press release announcing its results for the third quarter ended September 30, 2023 and providing a business update. A copy of the press release is furnished as Exhibit 99.1 hereto. In addition, the Company will hold a conference call on November 9, 2023 at 4:30 p.m. ET to discuss these results and the business update.

The information in this Current Report on Form 8-K (including Exhibit 99.1) shall not be deemed to be “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or otherwise subject to the liabilities of that section, nor shall it be deemed incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as expressly set forth by specific reference in such a filing.

Cautionary Note Regarding Forward-Looking Statements. Except for historical information contained in the press release attached as an exhibit hereto, the press release contains forward-looking statements which involve certain risks and uncertainties that could cause actual results to differ materially from those expressed or implied by these statements. Please refer to the cautionary note in the press release regarding these forward-looking statements.

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits.

By: /s/ Craig Shesky

Name: Craig Shesky

Title: Chief Financial Officer

The Metals Company Provides Third Quarter 2023 Corporate Update

NEW YORK, Nov. 9, 2023 — TMC the metals company Inc. (Nasdaq: TMC) (“TMC” or “the Company”), an explorer of lower-impact battery metals from seafloor polymetallic nodules, today provided a corporate update and financial results for the third quarter ending September 30, 2023.

Q3 2023 Financial Highlights

- Net loss of \$12.5 million and net loss per share of \$0.04 for the quarter ended September 30, 2023
- Total cash of approximately \$22.5 million at September 30, 2023
- Total liquidity of approximately \$56 million at September 30, 2023 inclusive of existing cash, \$9 million expected additional closings from ERAS Capital LLC in the previously announced Registered Direct Offering, and the undrawn \$25 million unsecured credit facility from an affiliate of Allseas Group SA

Gerard Barron, TMC Chairman and CEO, commented: “We are laser-focused on putting together the best possible application to allow us to move from exploration to exploitation phase on our NORI -D contract area, and we remain focused on targeting commercial production as early as Q4 2025. To this end, the pre-feasibility study (“PFS”) and Environmental Impact Statement (“EIS”) are currently taking most of TMC's resources and attention.

For the offshore segment of the PFS, together with our strategic partner Allseas, we have gone through several mine planning iterations and design reviews of the Project Zero nodule collection and transport system with expected capacity to handle 3 million wet tonnes of nodules per year. The offshore EIS process is generating very encouraging insights based on last year's nodule collection test which are informing our designs and plans. We have also started sharing these insights with stakeholders at ISA events and, importantly, we are now in a position to meaningfully engage with the ocean conservation community—an invitation I extended through my open letter earlier this month. To further strengthen our EIS, we are planning to conduct an additional offshore campaign to revisit the collector test site 12 months after completion of the initial collector tests. To support our operations, including this additional campaign, in August 2023 we announced a Registered Direct Offering of common shares and accompanying Class A warrants at \$2 per share, with anticipated gross proceeds to TMC of approximately \$24.9 million.

For the onshore segment of the PFS, we have made real progress in Japan where Pacific Metals Co Ltd (PAMCO) has done considerable work and validated that seafloor nodules can be tolled through their facility producing intermediate products that align with our specifications. Therefore, we believe all of the pieces are starting to come together—albeit we still have a few more quarters’ worth of hard work ahead of us to deliver an application for an exploitation contract of which we can all be proud.”

Operational Highlights

- **NORI Researchers to Revisit Site of Last Year's Nodule Collection System Test:** In November 2023, TMC and its subsidiary Nauru Ocean Resources Inc. (NORI) provided further details on a previously announced offshore campaign to assess seafloor ecosystem function in NORI Area D a year after its pilot collection system trials. Marine scientists will conduct an array of studies to collect further environmental data on ecosystem recovery and functioning in the area of the pilot nodule collection system test as well as in areas adjacent to and at various distances from the collector tracks, which are expected to increase the quality of NORI's application for an exploitation contract expected to be lodged following the July 2024 session of the International Seabed Authority (ISA).
 - **TMC Releases Second Annual Impact Report:** In October 2023, TMC published its 2022 Impact Report, which provides an update on key milestones achieved in its assessment of the environmental and social impacts of seafloor nodule collection and those impacts relative to land-based alternatives, and the efforts TMC is undertaking to eliminate or reduce such impacts. As part of the Impact Report, TMC also introduced its Sustainability Approach highlighting its thought processes about how TMC intends to fully align its activities to environmental, social and governance (ESG) principles.
 - **TMC Provides a Closing Update on Registered Direct Offering:** In August 2023, TMC entered into a securities purchase agreement for a Registered Direct Offering of up to 12,461,540 of its common shares and Class A warrants to purchase up to 6,230,770 common shares for expected gross proceeds of \$24.9 million, the majority of which has already been received. We expect that two additional closings will occur on or before November 30, 2023 and January 31, 2024 for approximately \$2.5 million and \$6.5 million, respectively, from ERAS Capital LLC. Each common share and the accompanying Class A Warrant to purchase 0.5 of a common share were sold at a price of \$2.00. The exercise price of the Class A warrants is \$3.00 with a mandatory warrant exercise provision if the 30-day volume weighted-average price (VWAP) of TMC's common stock exceeds \$6.50.
 - **Next Phase of Adaptive Management System Development Announced:** Following the delivery of a prototype Digital Twin from Kongsberg Digital in 2022 and its deployment during the collector tests in the same year, TMC announced in September 2023 that it had entered into the next phase of its relationship with Kongsberg Digital to further develop the Digital Twin which will integrate multiple data streams from TMC's future production system and is designed to enable 3D visualization of its deep-sea operating environment, providing 'eyes and ears' to the regulator and stakeholders. The Digital Twin is a core component of TMC's broader Adaptive Management System (AMS) which is designed to utilise AI and hybrid machine learning capabilities of the Digital Twin with expert analysis to ensure operations remain within environmental impact thresholds, a system with potential applications for resource operations at sea and on land.
-

Industry Update

- **International Seabed Authority:** From October 30 to November 8, 2023, Part III of the ISA's 28th Session took place in Kingston, Jamaica, where the Council moved the regulations into their next phase of negotiation. Additional formal sessions will be held in March 2024 and July 2024 alongside informal intersessional working groups.
- **Letter from US House Leaders from Texas in Support of Funding for TMC Feasibility Study:** In November 2023, TMC welcomed a letter from Members of the US House of Representatives from Texas to the Department of Defense in support of funding a bankable feasibility study for a nodule processing plant along the Texas Gulf Coast. The letter recognizes such a plant represents an investment in US national security, domestic economy, and production of clean energy materials. Given the concentration of robust marine, energy and chemicals industries concentrated along the Texas Gulf Coast, the region could be well -suited to support TMC's Project One facility requirements but does not change TMC's capital-light approach to initial production using existing processing facilities in Asia.

Financial Results Overview

At September 30, 2023, TMC held cash of \$22.5 million and held no debt. We believe that our cash on hand, the remaining expected net proceeds from the Registered Direct Offering and borrowing availability under our recently amended and extended credit facility with an affiliate of Allseas will be sufficient to meet our working capital and capital expenditure commitments for at least the next twelve months from today.

TMC reported net loss of approximately \$12.5 million, or \$0.04 per share for the quarter ended September 30, 2023, compared to net loss of \$27.9 million, or \$0.12 per share, for the quarter ended September 30, 2022. Exploration and evaluation expenses during the quarter ended September 30, 2023 were \$7.9 million compared to \$22.7 million for the quarter ended September 30, 2022, a significant decrease in 2023 as the prior year included active work on the collector test which was completed in November 2022, partially offset by increased spending on prefeasibility studies and engineering work which commenced in the fourth quarter of 2022. General and administrative expenses were \$4.6 million for the quarter ended September 30, 2023 compared to \$5.9 million for the quarter ended September 30, 2022, reflecting lower share-based compensation in the 2023 period, as options with specific market capitalization vesting conditions were fully amortized in 2022, partially offset by higher spending on consulting and advisory work.

Conference Call

TMC will hold a conference call today at 4:30 p.m. ET to provide an update on recent corporate developments, third quarter 2023 financial results and upcoming milestones.

Third Quarter 2023 Conference Call Details

Date:	Thursday, November 9, 2023
Time:	4:30 pm ET
Audio-only Dial-in:	Register Here
Virtual webcast w/ slides:	Register Here

Please register with the links above at least ten minutes prior to the conference call. The virtual webcast will be available for replay in the 'Investors' tab of the Company's website under 'Investors' > 'Media' > 'Events and Presentations', approximately two hours after the event.

About The Metals Company

The Metals Company is an explorer of lower-impact battery metals from seafloor polymetallic nodules, on a dual mission: (1) supply metals for the global energy transition with the least possible negative impacts on planet and people and (2) trace, recover and recycle the metals we supply to help create a metals commons that can be used in perpetuity. The Company through its subsidiaries holds exploration and commercial rights to three polymetallic nodule contract areas in the Clarion Clipperton Zone of the Pacific Ocean regulated by the International Seabed Authority and sponsored by the governments of Nauru, Kiribati and the Kingdom of Tonga. More information is available at www.metals.co.

Forward Looking Statements

Certain statements made in this press release are not historical facts but are forward-looking statements for purposes of the safe harbor provisions under The Private Securities Litigation Reform Act of 1995. Forward-looking statements generally are accompanied by words such as “believe,” “may,” “will,” “estimate,” “continue,” “anticipate,” “intend,” “expect,” “should,” “would,” “plan,” “predict,” “potential,” “seem,” “seek,” “future,” “outlook” and similar expressions that predict or indicate future events or trends or that are not statements of historical matters, including related to TMC’s current expectations and projections related to its financial condition and business outlook, how long TMC’s cash and liquidity will fund operations, the adoption of final regulations by the ISA, including the timing and content thereof, TMC’s expectations with respect to filing an application for an exploitation contract or an application for a plan of work for exploitation with the ISA and the timing and content thereof, including the impact on such application the results of the planned post-collector test campaign may have, the timing and content of the PFS and EIS, Allseas Group S.A. and NORI’s plans for the development of the commercial offshore system, including where offshore systems may be located, and the timing, terms, and amount of proceeds from the recently announced registered direct offering. These forward-looking statements involve significant risks and uncertainties that could cause the actual results to differ materially from those discussed in the forward-looking statements. Most of these factors are outside TMC’s control and are difficult to predict. Factors that may cause such differences include, but are not limited to: TMC’s ability to close the final two expected closings of the Registered Direct Offering; the risk that the investors will not exercise the warrants issued or issuable as part of the registered direct offering; TMC’s strategies and future financial performance; the ISA’s ability to timely adopt the final mining regulations and/or willingness to review and/or approve a plan of work for exploitation under the United Nations Convention on the Laws of the Sea (UNCLOS); TMC’s ability to obtain exploitation contracts or approved plans of work for exploitation for its areas in the Clarion Clipperton Zone; regulatory uncertainties and the impact of government regulation and political instability on TMC’s resource activities; changes to any of the laws, rules, regulations or policies to which TMC is subject, including the terms of the final mining regulations, if any, adopted by ISA and the potential timing thereof; the impact of extensive and costly environmental requirements on TMC’s operations; environmental liabilities; the impact of polymetallic nodule collection on biodiversity in the Clarion Clipperton Zone and recovery rates of impacted ecosystems; TMC’s ability to develop minerals in sufficient grade or quantities to justify commercial operations; the lack of development of seafloor polymetallic nodule deposit; TMC’s ability to successfully enter into binding agreements with Allseas Group S.A. and other parties in which it is in discussions, if any; uncertainty in the estimates for mineral resource calculations from certain contract areas and for the grade and quality of polymetallic nodule deposits; risks associated with natural hazards; uncertainty with respect to the specialized treatment and processing of polymetallic nodules that the Company may recover; risks associated with collective, development and processing operations, including with respect to the development of onshore processing capabilities and capacity and Allseas Group S.A.’s expected development efforts with respect to the Project Zero offshore system; TMC’s dependence on Allseas Group S.A.; fluctuations in transportation costs; fluctuations in metals prices; testing and manufacturing of equipment; risks associated with TMC’s limited operating history, limited cash resources and need for additional financing; risks associated with TMC’s intellectual property; Low Carbon Royalties’ limited operating history; and other risks and uncertainties, including those under Item 1A “Risk Factors” in TMC’s Annual Report on Form 10-K for the year ended December 31, 2022, filed by TMC with the Securities and Exchange Commission (“SEC”) on March 27, 2023, as updated and/or supplemented by TMC’s Quarterly Report on Form 10-Q for the quarter ended June 30, 2023, filed with the SEC on August 14, 2023, and in TMC’s other future filings with the SEC, including TMC’s Quarterly Report on Form 10-Q for the quarter ended September 30, 2023 when filed with the SEC. TMC cautions that the foregoing list of factors is not exclusive. TMC cautions readers not to place undue reliance upon any forward-looking statements, which speak only as of the date made. TMC does not undertake or accept any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements to reflect any change in its expectations or any change in events, conditions, or circumstances on which any such statement is based except as required by law.
